**HERS0255****HERSCHELL POLISH
& WAX 400ML****DESCRIPTION**

- A convenient aerosol for car enthusiasts providing first aid for paintwork of cars, bakkies and trucks. It cleans and polishes in one application.
- Contains silicones, waxes and oils which enhance colour and depth of shine.
- The inclusion of safe abrasives gently smooth over swirl marks, paint imperfections and light scratches.
- The high wax concentration forms a protective barrier between car washes.

APPLICATION

Typical uses include the removal of tree or thorn scratches on 4 X 4's, scuff marks on boot bumper, scratches behind door handles and general scuff marks on paint work

**HERS0025****HERSCHELL TYRE & DASH
SPRAY CHYPRESE 400ML****DESCRIPTION**

- An aerosol containing silicone which is a translucent oil like fluid derived from Silica.
- Insures long lasting shine to tyres, unpainted plastic bumpers and interior components.
- Naturally, anti-static and water resistant.
- Available in 3 fragrances.
- Aerosol applicator insures an even and thin layer application.

APPLICATION

- Ideal for automotive dealer shops, car owners, fleet management, car wash centers and auto parts stores.
- Provides UV protection to surfaces, preventing fading and cracking caused by prolonged exposure to sunlight.
- Cleans and protects dashboard surfaces from dust, dirt and UV damage, maintaining a pristine appearance.
- Revitalizes tire sidewalls, giving them a clean and glossy finish while also protecting against UV damage and cracking.

**HERS0035****HERSCHELL TYRE & DASH
SPRAY CHERRY 400ML****HERS0030****HERSCHELL TYRE & DASH
SPRAY LAVENDAR 400ML****DESCRIPTION**

- An aerosol containing silicone which is a translucent oil like fluid derived from Silica.
- Insures long lasting shine to tyres, unpainted plastic bumpers and interior components,
- Naturally, anti-static and water resistant.
- Available in 3 fragrances.
- Aerosol applicator insures an even and thin layer application.

APPLICATION

- Ideal for automotive dealer shops, car owners, fleet management, car wash centers and auto parts stores.
- Provides UV protection to surfaces, preventing fading and cracking caused by prolonged exposure to sunlight.
- Cleans and protects dashboard surfaces from dust, dirt and UV damage, maintaining a pristine appearance.
- Revitalizes tire sidewalls, giving them a clean and glossy finish while also protecting against UV damage and cracking.

**HERS0265****HERSCHELL WASH
& WAX 5L****HERS0260****HERSCHELL WASH
& WAX 750ML****DESCRIPTION**

- As a powerful cleaner and paint protector, Wash & Wax Car Shampoo provides an unrivalled shine for your vehicle. Its blue water-based formula effectively lifts oily residues, grime and dirt, leaving a concours-like finish with minimal effort.
- High concentrations of both synthetic and natural waxes
- Offers long-lasting shine and paint protection for a velvety smooth finish.

APPLICATION

- Removes dirt and grime using 3 specialized detergents with only 2 caps per bucket.
- Shines & protects the paintwork and contains carnauba and synthetic waxes.
- Can be diluted up to, one part to 40.

**HERS0150****HERSCHELL ENGINE
CLEANER 5L****DESCRIPTION**

- A translucent red alkaline water-based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- Environmentally friendly to fish and plants
- Engine cleaning: Efficiently removes dirt, grease, and oil build-up from engine surfaces, enhancing engine performance and longevity.
- Plastic friendly
- Strongest detergent effect at 1-4 with water

APPLICATION

- Degreasing: Ideal for cleaning various engine components and parts, ensuring they operate smoothly and effectively.
- Apply on the engine and greasy area and leave to sit for a few minutes, then rinse off with clean, runny water.

**HERS0145****HERSCHELL ENGINE
CLEANER 500ML****DESCRIPTION**

- A translucent red alkaline water-based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- Environmentally friendly to fish and plants
- Engine cleaning: Efficiently removes dirt, grease, and oil build-up from engine surfaces, enhancing engine performance and longevity.
- Plastic friendly

APPLICATION

- Degreasing: Ideal for cleaning various engine components and parts, ensuring they operate smoothly and effectively.
- Apply on the engine and greasy area and leave to sit for a few minutes, then rinse off with clean, runny water.

**HERS0155****HERSCHELL MAG
CLEANER SPRAY 750ML****DESCRIPTION**

- Removes stubborn brake dust and grime.
- High detergency, safe to use on aluminum & alloy.

APPLICATION

- High potency water-based formulation.
- Powerful surfactants / detergents dissolves and lifts oxidized road deposits, brake dust and other unwanted soils.
- A small but effective treat of acid assists in loosening the chemical bond between the iron oxide dust and the wheel surface.
- Inclusion of acid breaks the chemical bond between iron oxide dust and wheel surface.

**HERS0140****HERSCHELL OPTI-VIEW
CLEANER 750ML****DESCRIPTION**

- Water based cleaner to remove road grime and insects from bonnet, grill and headlights.

APPLICATION

- Safe to use on most paint work.
- Contains highly effective degreasing and emulsifying properties.
- Effectively cleans glass and mirrors to a streak free shiny finish.
- Dual action foaming trigger allows foam to cling on vertical surfaces.

**HERS0505****HERSCHELL GREASE C.V.
JOINT TUBE100G****DESCRIPTION**

- C.V joint grease for enhancing the performance and lifespan of constant velocity (CV) joints.
- Engineered with a special non-separating formula, designed to meet the demands of modern vehicles, ensuring smooth and efficient operation.
- Boasts a unique formula that prevents separation, ensuring consistent performance and lubrication.
- Provides an additional layer of protection, reducing friction and wear on CV joints.
- Effectively lubricating CV joints, this grease greatly extends their service life, minimizing the need for frequent maintenance and replacements.
- High Moly and polymer content ensures the grease is able to protect constant velocity and universal joints subject to high torque and centrifugal forces
- Lithium complex thickener ensures high temperature performance

APPLICATION

- Ideal for automotive industry and industrial machinery.

**HERS0530****HERSCHELL GREASE
C.V JOINT TUB 500G****DESCRIPTION**

- C.V joint grease for enhancing the performance and lifespan of constant velocity (CV) joints.
- Engineered with a special non-separating formula, designed to meet the demands of modern vehicles, ensuring smooth and efficient operation.
- Boasts a unique formula that prevents separation, ensuring consistent performance and lubrication.
- Provides an additional layer of protection, reducing friction and wear on CV joints.
- Effectively lubricating CV joints, this grease greatly extends their service life, minimizing the need for frequent maintenance and replacements.
- High Moly and polymer content ensures the grease is able to protect constant velocity and universal joints subject to high torque and centrifugal forces
- Lithium complex thickener ensures high temperature performance

APPLICATION

- Ideal for automotive industry and industrial machinery.

ELECTRICAL

**HERS0135****HERSCHELL SWITCH
CLEANER SPRAY 400ML****DESCRIPTION**

- A pale-yellow electrical cleaning solvent blended with synthetic oil and packed in an aerosol can with a short spout nozzle. Lubrication and cleaning: Improves the efficiency of electrical devices by reducing friction and removing dirt and debris.
- Precision spray: The aerosol spray allows for precise application, ensuring that even hard-to-reach areas are effectively treated.
- Lubrication and cleaning: Dual-action formula that both lubricates and cleans, ensuring optimal performance and extended lifespan of components.
- Versatile application: Suitable for a variety of electrical and mechanical parts including sliding switches, contacts, variable controls and relays.

APPLICATION

- Electrical maintenance: Ideal for use on brushes, circuit breakers, safety device switches, and other electrical components to ensure smooth operation and prevent malfunctions.
- Mechanical maintenance: Perfect for lubricating and cleaning variable controls, sliding switches and relay contacts in various mechanical devices.
- Industrial use: Trusted by professionals across various industries including manufacturing, automotive and aerospace for its reliability and effectiveness.

**HERS0205****HERSCHELL SEC DRY 500G****DESCRIPTION**

- A non ageing synthetic fluid in grease form for service on sliding contacts. Over long periods of time the lubricant does not change its resistance and therefore ensures the contactor does not overheat causing the silvering on its surface to melt. It has low carbon forming characteristics, and high oxidation stability.
- Has good lubrication properties even with heavy whitening contacts.
- Lowers resistance across contact.
- Prevent tacking and shorting out.
- Eliminates arcing.
- Does not carbonise or form harmful deposits.
- Not harmful to plastics and rubbers.
- Prolongs contact life.

APPLICATION

- Traditionally used in automotive engine and other automotive applications.

**HERS0160****HERSCHELL ELECTRONIC
CLEANER 400ML****DESCRIPTION**

- A solvent, which evaporates without residue to clean flux, dust and other atmospheric deposits from circuit boards of electronic equipment.
- Plastic friendly electrical equipment cleaner.
- Caution (flammable).
- Evaporates with no residues.

APPLICATION

- For use on most electrical components.
- Cleans flux, dust and other deposits on the circuit board.

**HERS0165****HERSCHELL ELECTRONIC
CLEANER 5L****DESCRIPTION**

- A solvent, which evaporates without residue to clean flux, dust and other atmospheric deposits from circuit boards of electronic equipment.
- Plastic friendly electrical equipment cleaner.
- Caution (flammable).
- Evaporates with no residues.

APPLICATION

- For use on most electrical components.
- Cleans flux, dust and other deposits on the circuit board.

**HERS0210****HERSCHELL SILICONE VARNISH CLEAR 400ML****DESCRIPTION**

- A medium-hard methylphenyl silicone resin with excellent anti-corrosive heat resistant, weather resistant and UV resistant properties. Clear silicone varnish for preserving and protecting metallic surfaces and circuit boards with unparalleled durability and efficiency. Crafted with a medium-hard methylphenyl silicone resin, it boasts exceptional anti-corrosive properties, making it an ideal choice for environments prone to corrosion. Ultra long life when exposed to direct sunlight.
- Excellent corrosion resistance.
- Heat resistant up to 400°C +
- Can be applied to plastic, wood, metal and ceramic surfaces.
- Restore old faded paint.
- Waterproofs porous ceramics such as tiles and bricks.
- Seals and waterproofs paper inkjet prints and other documents.
- Prevents tarnishing of polished metal surfaces such as copper and brass.
- Conformal coating for electronic circuit boards.
- Salt water resistant.
- Excellent dielectric strength.

APPLICATION

- Designed to provide a clear, long-lasting coating that effectively prevents rust formation on circuit boards and various metallic surfaces.
- Extensively used in the electronics and electrical sectors as a conformal coating, safeguarding delicate circuit boards from corrosion caused by saltwater and other environmental factors.
- Suitable for plastic, wood, metal, brick, stone, ceramics, electrical components, circuit boards, brass, copper and ornamental surfaces. Ideal for automotive, marine, aerospace and industrial settings.

**DESCRIPTION**

- A convenient and gentle aerosol way to remove atmospheric dust from computer circuits, electro mechanical components of printers, cameras lenses of optical equipment and many other applications.
- The gas contains no ozone depleting chemicals and is flammable so it may not be used on live circuitry or electrical equipment.

APPLICATION

- Blowing dust off: -
 - Cameras photographic equipment
 - Video heads
 - Optical Equipment
 - Photocopy machines
 - Electrical equipment
 - Switches
 - Electrical contacts
 - Relays
 - Reostats
 - Lenses
 - Binoculars

**HERS0001****HERSCHELL AIR
DUSTER - 400ML**

PROFESSIONAL

DESCRIPTION

- A multi-purpose and highly effective fluid for the maintenance, assembly and disassembly of machines and other technical equipment in industry and for land as well as sea vehicles.
- Offers a reliable corrosion protection for machines and machine elements during intermediate storage and transportation.
- Characterised by quick penetration even in areas difficult to access.
- It loosens rusted or frozen screw connections as well as other components, thus facilitating disassembly.
- Due to its adhesive properties to all metallic surfaces it provides excellent corrosion protection.
- It is powered by an Ozone friendly propellant.
- Water displacement properties dry and protect electrical equipment from malfunctions caused by moisture.
- Fluid lubricant.
- Protects metals from corrosion.
- Dissolves rust.
- Displaces water.
- Solvent cleaner.

APPLICATION

Due to its multi-purpose features it can be used in a wide scope of applications.

- As corrosion protection for:
 - ** Dies, chucks and drilling equipment, fittings tools and machines.
 - ** Electrical components, connectors, relays,

switches and fine precision instruments.

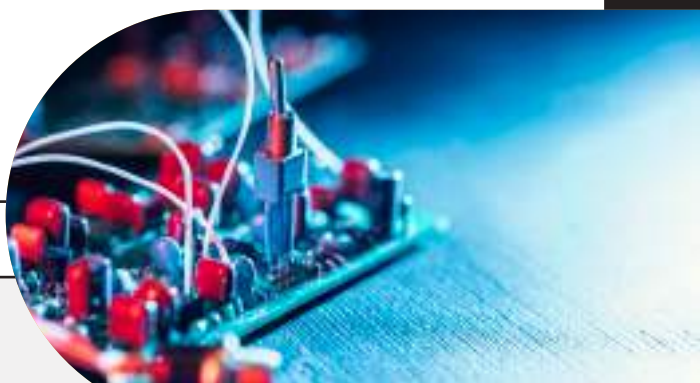

** Metallic parts in automobiles, boats, locks, building machines and cranes.

** All metallic parts that are manufactured, transported or stored.

HERS0005

**HERSCHELL MULTI
PURPOSE SPRAY 150ML**

**HERS0010****HERSCHELL MULTI
PURPOSE SPRAY 300ML****HERS0015****HERSCHELL MULTI
PURPOSE SPRAY 400ML****DESCRIPTION**

- A multi-purpose and highly effective fluid for the maintenance, assembly and disassembly of machines and other technical equipment in industry and for land as well as sea vehicles.
- Offers a reliable corrosion protection for machines and machine elements during intermediate storage and transportation.
- Characterised by quick penetration even in areas difficult to access.
- It loosens rusted or frozen screw connections as well as other components, thus facilitating disassembly.
- Due to its adhesive properties to all metallic surfaces it provides excellent corrosion protection.
- It is powered by an Ozone friendly propellant.
- Water displacement properties dry and protect electrical equipment from malfunctions caused by moisture.
- Fluid lubricant.
- Protects metals from corrosion.
- Dissolves rust.
- Displaces water.
- Solvent cleaner.

APPLICATION

Due to its multi-purpose features it can be used in a wide scope of applications.

- As corrosion protection for:
 - ** Dies, chucks and drilling equipment, fittings tools and machines.
 - ** Electrical components, connectors, relays, switches and fine precision instruments.
 - ** Metallic parts in automobiles, boats, locks, building machines and cranes.
 - ** All metallic parts that are manufactured, transported or stored.

**HERS0195****HERSCHELL CLEAN UP
BOTTLE 2L****DESCRIPTION**

- A translucent green water-based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- It's a water based environmentally friendly degreaser.
- Plastic Friendly with medium foam.
- Powerful degreaser suitable for machinery, factory floors, engine cleaning, household cleaning.
- Conforms to REACH specifications (Registration, Evaluation, Authorisation & Restriction of Chemicals) specifications.
- Can be diluted up to 1 – 15.
- Clean-up is concentrate and Can be diluted or used neat

APPLICATION

- Safe on all plastics, rubbers and formulated to clean stains from table cloths, carpets, mats, clothes and hard surfaces such kitchen counters, braai's, floors and paving.

**HERS0200****HERSCHELL CLEAN UP
BOTTLE 5L****DESCRIPTION**

- A translucent green water-based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- It's a water based environmentally friendly degreaser.
- Plastic Friendly with medium foam.
- Powerful degreaser suitable for machinery, factory floors, engine cleaning, household cleaning.
- Conforms to REACH specifications. (Registration, Evaluation, Authorisation & Restriction of Chemicals) specifications
- Can be diluted up to 1 – 15.
- Clean-up is concentrate and Can be diluted or used neat

APPLICATION

- Safe on all plastics, rubbers and formulated to clean stains from table cloths, carpets, mats, clothes and hard surfaces such kitchen counters, braai's, floors and paving.

**HERS0190****HERSCHELL CLEAN UP
BOTTLE 750ML****DESCRIPTION**

- A translucent green water-based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- It's a water based environmentally friendly degreaser.
- Plastic Friendly with medium foam.
- Powerful degreaser suitable for machinery, factory floors, engine cleaning, household cleaning.
- Conforms to REACH specifications.

APPLICATION

- Safe on all plastics, rubbers and formulated to clean stains from table cloths, carpets, mats, clothes and hard surfaces such kitchen counters, braai's, floors and paving.

**HERS0225****HERSCHELL SILICONE
PASTE 100G****DESCRIPTION**

- Protects battery terminals from corrosion and oxidation
- Renews the appearance of plastic and leather goods (apply as a polish)
- Waterproof ignition systems of cars, boats and aircraft.
- Formulated with a non-toxic composition, ensures the safety of products and manufacturing environment. Water Repellent, Electrical Insulator, Non-Toxic Polishing Grease / Paste In A Plastic Tube. Good For Plastics, Wood And Leather. -45 To 200 Deg C.

APPLICATION

- Lubrication of installing O-rings and seals
- Lubricants wood-on-wood, glass-on-wood, plastic-to-plastic, plastic-on-glass, rubber-to-rubber surfaces
- Reduces ice build-up in refrigerators and freezers.
- Outdoor house hold plugs, trucks & trailer brake and indicator lights connectors.
- Caravan tent groove lubricant.

**HERS0545****HERSCHELL GREASE
SILICONE PASTE 500G****DESCRIPTION**

- Protects battery terminals from corrosion and oxidation
- Renews the appearance of plastic and leather goods (apply as a polish)
- Waterproof ignition systems of cars, boats and aircraft.
- Formulated with a non-toxic composition, ensures the safety of products and manufacturing environment. Water Repellent, Electrical Insulator, Non-Toxic Polishing Grease / Paste In A Plastic Tube. Good For Plastics, Wood And Leather. -45 To 200 Deg C.

APPLICATION

- Lubrication of installing O-rings and seals
- Lubricants wood-on-wood, glass-on-wood, plastic-to-plastic, plastic-on-glass, rubber-to-rubber surfaces
- Reduces ice build-up in refrigerators and freezers.
- Outdoor house hold plugs, trucks & trailer brake and indicator lights connectors.
- Caravan tent groove lubricant.

**HERS0230****HERSCHELL SILICONE
SPRAY 400ML****DESCRIPTION**

- An aerosol containing silicone which is a translucent oil like fluid derived from Silica as used in glass making.
- It's properties make it invaluable for many industrial and domestic uses.
- Chemically stable - not attacked by sunlight, ultra violet light, rain, sleet, petrol, paraffin, gasses, steam or corrosive liquids such as acids.

APPLICATION

- Renewing the appearance of plastic goods e.g. car dashboards, briefcases and handbags.
- Lubricates wood on wood, glass on wood, plastic on glass, rubber to rubber e.g. drawers, kitchen cabinets.
- Lubricant for installation of O-rings and seals.
- Reduces ice build up in refrigerators and freezers.
- Improves sealing of rubber doors and seals.

HERS0515

**HERSCHELL GREASE
RED RUBBER 100G TUBE**

HERS0090

**HERSCHELL GREASE
RED RUBBER 500G****DESCRIPTION**

- HERSCHELL RED RUBBER GREASE is manufactured using highly refined vegetable / natural base oils which are carefully selected and then blended to produce a stable foundation for the grease. This base oil foundation allows the product to perform in applications where medium loads and speeds are typical.
- **Thermal stability:** Very good thermal stability allowing the grease to perform for short periods of time under extreme temperatures, regaining its original texture after cooling to ambient temperature.
- **Mechanical stability:** Allows for long periods of storage or non-use in the application without and mechanical breakdown of the grease thickener (e.g. oil separation)
- **Anit-corrosive properties:** Exhibits very good to excellent anti-rust and anti-corrosion properties.
- **Water resistance:** The thickener has very good natural attributes which displace and resist water ingress.
- **Heat Resistance:** Exhibits excellent resistance to heat.

APPLICATION

- For lubrication of components where the hardening or swelling of the rubber must be avoided.
- For use when assembling hydraulic brake, clutch and suspension (e.g. o-rings, valves, diaphragms, cups and seals).
- For the assembly of natural and synthetic rubber components in automotive brake/clutch systems, suspension units and hydraulic systems.
- Exhibits excellent resistance to heat.
- Compatible with all plastics and natural and synthetic rubbers.
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.

HERS0500

**HERSCHELL GREASE
WHEEL BEARING TUBE 100G**

HERS0525

**HERSCHELL GREASE
WHEEL BEARING TUBE 500G**

DESCRIPTION

- High-Temp, high load /impact wheel bearing grease; designed for race & rally conditions. A Lithium Soap formulation fortified with molybdenum disulphide offers unrivaled performance and heat resistance. For use on all cars, trucks, tractors, motorbikes, race-car, trailer, and agricultural bearings and wheel bearings.
- **Thermal stability:** Very good thermal stability allowing the grease to perform for short periods of time under extreme temperatures, regaining its original texture after cooling to ambient temperature.
- **Mechanical stability:** Allows for long periods of storage or non-use in the application without and mechanical breakdown of the grease thickener (e.g. oil separation)
- **Water resistance:** The thickener has very good natural attributes which displace and resist water ingress.
- **Heat Resistance:** Exhibits excellent resistance to heat.
- **Excellent reversibility:** After being subject to high temperatures, the grease has excellent reversal characteristics allowing the re-absorption of oil released

APPLICATION

- Chassis lubrication, hinges, winding mechanisms, suspension, steering linkage systems, etc...
- Light automotive and trailer wheel bearings. Good corrosion protection, thermally and mechanically stable, specially suitable for wheel bearings and hub units in cars and light trailers.
- Ball & roller bearings, conveyor bearings, plain bearings, slides - general industrial lubrication needs.
- After being subject to high temperatures, the grease has excellent reversal characteristics allowing the re-absorption of oil released.
- General purpose lubrication of all automotive and agricultural equipment.
- Heavy duty wheel bearings on construction, earthmoving and agricultural equipment. Good corrosion protection, thermally and mechanically stable, specially
- Suitable for wheel bearings and hub units in cars and trucks.
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.

**HERS0520****HERSCHELL GREASE ASSEMBLY BLACK TUBE 100G****DESCRIPTION**

- Black Assembly grease is a Lithium Plus based grease supported by a combination of extreme pressure additives.
- Designed for the initial lubrication of engine parts to protect and prepare parts from initial start-up.
- Ideal for ultra high loads, press fittings, threaded shafts, thrust bearings, and timing chains.
- Black Grease with NLGI 2 casification.
- Exceeds 800kg weld loads (ASTM D-2266)
- Not for use in anti-friction (ball or roller) bearings.

APPLICATION

- Ideally suited to lubricate main and big end bearing caps, camshaft bearings and lobes, and an anti-seize compound for stainless steel threads.

**HERS0235****HERSCHELL SILICONE OIL 5L (500CST)****DESCRIPTION**

- A fully translucent Dimethyl Silicone Fluid known chemically as polymethyl-siloxanes.
- Silicone oil 500 centistokes viscosity
- Excellent lubricant will not degrade rubber or plastics.
- Prevent weld spatter adhesive

APPLICATION

Silicone oil is commonly used as a lubricant in a variety of industrial and household applications due to its low surface tension and chemical stability. Some common uses of silicone oil as a lubricant include:

Dimethyl Silicone Fluids are recommended for a wide variety of industrial applications. For example in polishes and cosmetics, as anti-float additives in paint and printing inks, in dashpots and damping devices, as liquid dielectrics and as antifoams in lube oils.

- Lubricating moving parts in machinery, such as gears, bearings, and conveyor systems.
- Lubricating plastic and rubber parts to prevent sticking and wear.
- Lubricating door hinges, locks, and other household items.
- As a release agent in the manufacturing of molded plastic parts and rubber products.
- As a lubricant for medical devices, such as catheters and syringes.

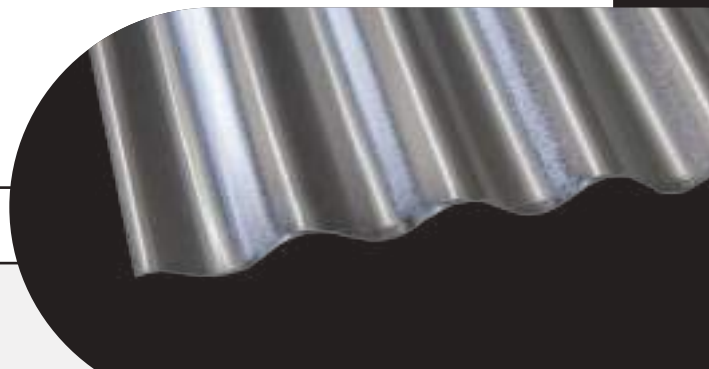

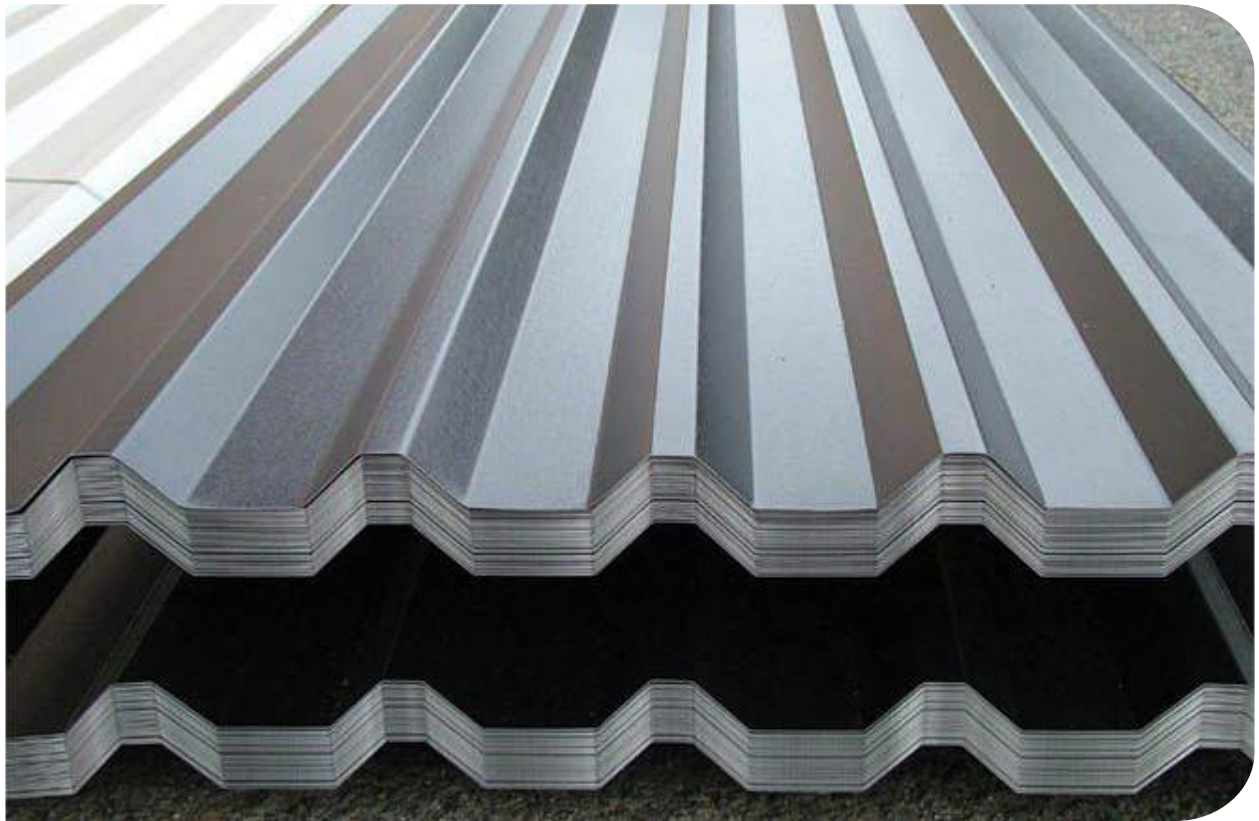

**DESCRIPTION**

- Cold Zinc Galvanising product
- Protects bare metal surfaces from corrosion after drilling and welding.
- Repairs damaged galvanized surfaces.
- Anti corrosion primer for any type of car finish or paint coating.
- It's an excellent zinc spray paint with fine zinc particles that prevents rust and offers protection if scratched.

APPLICATION

- Protects bare metal surfaces from corrosion after drilling and welding. Repairs damaged galvanized surfaces. Anti corrosion primer for any type of car finish or paint coating.

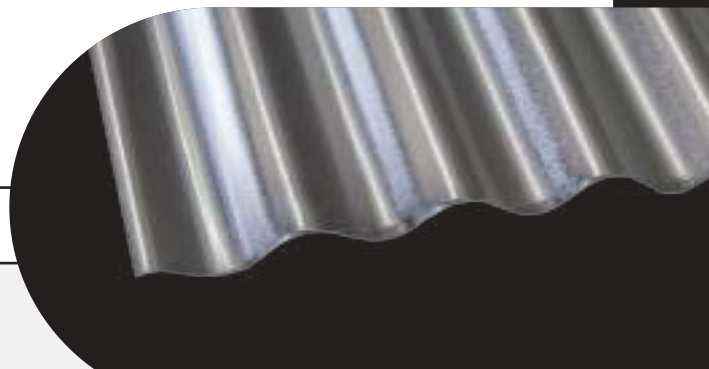

**HERS0125****HERSCHELL ZINC
PROTECTOR COLD ZINC 5L**

**DESCRIPTION**

- Cold Zinc Galvanising product
- Protects bare metal surfaces from corrosion after drilling and welding.
- Repairs damaged galvanized surfaces.
- Anti corrosion primer for any type of car finish or paint coating.
- It's an excellent zinc spray paint with fine zinc particles that prevents rust and offers protection if scratched
- Industry standard cold galvanising spray.

APPLICATION

- Protects bare metal surfaces from corrosion after drilling and welding. Repairs damaged galvanized surfaces. Anti corrosion primer for any type of car finish or paint coating.

**HERS0130****HERSCHELL ZINC
PROTECTOR COLD ZINC 400ML**

**HERS0510****HERSCHELL GREASE GARAGE
DOOR & MARINE 100G****HERS0535****HERSCHELL GREASE GARAGE
DOOR & MARINE 500G****DESCRIPTION**

- Ensures silent and fuss-free operation on all gate and door mechanisms, including hinges, pins, gears, worm drives, rack and pinion and chain types operations.
- Its white colour ensures far less unsightly grease marks/stains on job or hands.

APPLICATION

- Guideways and sliding surfaces where heavy loads require “clean” white lubrication at low and medium speeds.
- Use for electrical and domestic appliances, packaging and office machinery, precision instruments, machinery in food and bottling plants, also on textile, plastic and rubber moulding machinery.
- High load capacity. Resists high temperature, shocks & vibration.
- Excellent metal adhesion. Repels water and chemicals.
- White solid lubricant prevents seizure, stick slip and galling. Protects machines from corrosion.
- White clean lubricant for food, printing, plastic and rubber moulding machinery. Extended lubrication cycles. Full boundary lubrication.
- Ideal for use on marine and deck equipment. Boat or jet ski trailer bearings
- Gate motor rack and pinion drives.
- Electric garage door chain or worm and screw drives. Domestic and Industrial sliding and roller door/gate hinges, pins, rollers and slides

**HERS2520****HERSCHELL GREASE
GARAGEDOOR & GATE 400ML****DESCRIPTION**

- Specifically designed to suit the sliding and oscillating movements of all doors and gates at home and in Industry. Its white colour ensures far less unsightly grease marks/stains on job or hands.

APPLICATION

- For the silent and fuss-free operation on all gate and door mechanisms, including hinges, pins, gears, worm drives, rack and pinion and chain types operations. Excellent for both manual and electronically operated instruments, particularly in the door sideways and channels. Unrivalled long term lubrication.

**HERS3001****HERSCHELL LABEL
LIFT - 400ML****DESCRIPTION**

- A blend of solvents to form a highly effective fluid for the removal of self adhered labels from metallic and most plastic surfaces.

APPLICATION

- Use on all solvent resistant surfaces.
- For Inks spray on to surface. Rub with a non-abrasive pad or cloth then remove with a dry cloth.
- For glues and gums break the surface of the gum if possible soak the sticky back label then remove the deposits with a scraper. A further application will soften and remove any remaining deposit.

WARNING

Some plastic surfaces may be sensitive to this solvent. Before use test a small area in a inconspicuous place to ascertain suitability.

DESCRIPTION

- A Copper coloured non melt paste of N.L.G.I. 1 1/2 consistency for dip or brush application to prevent seizure, whilst in service of threaded connections, nuts and bolts. This ensures easy disassembly of treated fasteners even if subjected to high temperatures or weathering.
- Prevents corrosion
- Prevents seizing of parts
- Fuss free disassembly of threads, nuts and bolts

APPLICATION

- Lubrication and protection of threaded or mating surfaces such as nuts and bolts, screws, pipe threads, exhaust manifolds, cylinder head studs, drilling rods, etc...
- Aids with the sealing all types joints whether under hot or cold conditions. Remains soft.
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.
- Prevents the effects of tribo-corrosion on opposing thread flanks.
- Applied to the reverse (caliper or piston) side of a brake pad this product prevents annoying disc brake squeal.

**HERS0185****HERSCHELL COPPER
ANTI-SEIZE PASTE 5KG**

**HERS0180****HERSCHELL COPPER
ANTI-SEIZE PASTE 500G****HERS0170****HERSCHELL COPPER
ANTI-SEIZE TUBE 100G****DESCRIPTION**

- A Copper coloured non melt paste of N.L.G.I. 1 1/2 consistency for dip or brush application to prevent seizure, whilst in service of threaded connections, nuts and bolts. This ensures easy disassembly of treated fasteners even if subjected to high temperatures or weathering.
- Prevents corrosion
- Prevents seizing of parts
- Fuss free disassembly of threads, nuts and bolts

APPLICATION

- Lubrication and protection of threaded or mating surfaces such as nuts and bolts, screws, pipe threads, exhaust manifolds, cylinder head studs, drilling rods, etc...
- Aids with the sealing all types joints whether under hot or cold conditions. Remains soft.
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.
- Prevents the effects of tribo-corrosion on opposing thread flanks.
- Applied to the reverse (caliper or piston) side of a brake pad this product prevents annoying disc brake squeal.

**HERS2148**
**HERSCHELL GREASE G/P
CARTRIDGE 400ML**
DESCRIPTION

- Manufactured using highly refined mineral base oils which are carefully selected and then fortified with synthetic polymers, producing a highly shear stable foundation for the grease. This base oil foundation allows the product to perform in applications where medium loads and speeds are typical.

APPLICATION

- Chassis lubrication, hinges, winding mechanisms, suspension, steering linkage systems, etc...
- Light automotive and trailer wheel bearings. Good corrosion protection, thermally and mechanically stable, specially suitable for wheel bearings and hub units in cars and light trailers.
- Ball & roller bearings, conveyor bearings, plain bearings, slides - general industrial lubrication needs.
- After being subject to high temperatures, the grease has excellent reversal characteristics allowing the re-absorption of oil released
- General purpose lubrication of all automotive and agricultural equipment.
- Multipurpose industrial applications with heavier loads and slower speeds. Sliding machine elements (cams and ways).
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.

**HERS1645**
**HERSCHELL SILICONE
DAMP CURE 400ML**
DESCRIPTION

- A do-it-yourself aerosol containing a colourless film forming agent to cure the problems caused by damp in houses, flats and factories.

APPLICATION

- Rising damp
- Water seeping through bath and shower tiles into adjoining rooms or lower - storey ceilings.
- Peeling paint.
- Mould growth.
- Effloresce and salt damage from hydration and crystallisation.
- Attack by fungi, lichen, moss and algae.
- Corrosion of concrete reinforcement.
- Cracks caused by swelling and shrinkage
- Lime leaching.
- Frost damage.

**DESCRIPTION**

- Maintains function of all gym equipment including belts, pulleys, chains, cables, hinges, bearings and roller tracks.

APPLICATION

- Sprayed directly between treadmill belt and onto wooden, steel or composite platforms this lubricant will ensure long-lasting, smooth non-slipping/sticking performance.
- Applied or sprayed onto plastic and metal pulleys this lubricant will remain in place and not polymerise plastic cable sheaths.
- Sprayed onto weight pins this lubricant will ensure long lasting easy of use whilst not promoting the formation of rust as is often the case with other lubricants.
- This lubricant to be sprayed directly onto any electronic or mechanical gym equipment mechanicals that contains plain or ball bearings, chains, splines, rachets, wire-ropes, threads, or keyways.

**HERS2515****HERSCHELL GYM EQUIPMENT
LUBRICANT 400ML**

INDUSTRIAL

**DESCRIPTION**

- A Copper coloured non melt aerosol application to prevent seizure, whilst in service of threaded connections, nuts and bolts. This ensures easy disassembly of treated fasteners even if subjected to high temperatures or weathering.
- Prevents corrosion
- Prevents seizing of parts
- Fuss free disassembly of threads, nuts and bolts

APPLICATION

- Lubrication and protection of threaded or mating surfaces such as nuts and bolts, screws, pipe threads, exhaust manifolds, cylinder head studs, drilling rods, etc...
- Aids with the sealing all types joints whether under hot or cold conditions.
- General recommendation - avoid contamination of the grease by dust, moisture and/or dirt when applying the product.
- Prevents the effects of tribo-corrosion on opposing thread flanks.

**HERS0175****HERSCHELL COPPER
ANTI-SEIZE SPRAY 400ML**

**DESCRIPTION**

- A hybrid product especially developed for the South African Gold and Coal Mining Industries.
- Multi-purpose and highly effective for the maintenance, assembly and disassembly of machines and other technical equipment in the industry and for land as well as sea vehicles.
- It's a non-flammable penetrating spray.
- Deep penetrating light duty lubricant and releasing fluid.
- Corrosion prevention.
- Rust dissolver and loosener .
- Repels Water.
- Demoisuriser electrical equipment.

APPLICATION

- Apply to rusty, moist or tight components and allow to penetrate for several minutes. Repeat if necessary.
- For corrosion protection, apply to clean areas thinly and evenly.

**HERS0020****HERSCHELL ELECTROGLISS
SPRAY N/FLAM 400G**

**DESCRIPTION**

- Belt dressing spray for maintaining optimal performance and extending the lifespan of vee, round or flat belt types.
- Clear fluid specially formulated with additives designed to rejuvenate aging poly and V-belts, ensuring they operate smoothly and efficiently.
- Prevent slipping during operation, which not only enhances safety but also maximizes power delivery.
- Resistant to water wash-out ensures durability even in demanding environments, while its anti-fling properties help maintain cleanliness and prevent messy residue.
- Increases belt life expectancy for flat and V belts .
- Reduces slipping.
- Increases the effectiveness of the tensile strength.
- Transmits the full drive capacity.
- Adheres to belt without attracting dust and dirt.
- Minimizes belt squeal.

APPLICATION

- Suitable for all types of belts, including rubber, fabric and leather. Ideal for manufacturing plants to automotive workshops, agricultural settings to industrial facilities.

**HERS0105****HERSCHELL BELT
DRESSING SPRAY 400ML**

**HERS0040****HERSCHELL .A. WELD
CLEANER 400ML****DESCRIPTION**

- A three part rapid fluid system to find cracks and flaws in metals, too small to be seen by the naked eye, without in any way damaging the component being tested or preventing it from easily repaired.
- A quick drying solvent blend which will remove all dirt, oil and greases which could seal flows that should be detected.
- Low halogen sulphur formula.
- Fast drying solvent.

APPLICATION

- Welded areas that must be free of flaws.
- Routine maintenance of machine components
- Potential fatigue cracks induced by stress in industrial and automotive machinery
- Diecast components

**HERS0045****HERSCHELL .B. DYE
PEN 400ML****DESCRIPTION**

- This is a penetrating oil formula containing a high level of red dye has very low surface tension and excellent wetting which allows ink to deep penetrate into potential cracks or flaws otherwise undetected by the naked eye.
- The red dye is specifically chosen for its good visibility in natural, artificial light or ultra violet light.
- The dye penetrant is then applied by spraying liberally over the prepared surface. Penetration time is critical. A minimum of 5 minutes up to 60 minutes when looking for fine cracks.
- Must be cleaned with a lint free cloth or industrial absorbent paper, repeat the process until most traces of the penetrant has been removed.
- Low halogen sulphur formula

APPLICATION

- Welded areas that must be free of flaws.
- Routine maintenance of machine components
- Potential fatigue cracks induced by stress in industrial and automotive machinery
- Diecast components

**HERS0050****HERSCHELL .C.
DEVELOPER 400ML****DESCRIPTION**

- This is a white absorbent formula which withdraws the highly colored dye penetrant from cracks and flaws and contrasts this vividly against its white background.
- Thick White layer that acts as a blotting paper against which the red dye will be drawn out of potential cracks used in your NDT system.
- Applied as quick as possible after the Dye Pen process.
- Increases the visibility of the potential cracks.
- Dye pen takes 10 – 30 Minutes to bleed against the white background.

APPLICATION

- Welded areas that must be free of flaws.
- Routine maintenance of machine components
- Potential fatigue cracks induced by stress in industrial and automotive machinery
- Diecast components

**HERS0055****HERSCHELL ENGINEERS
MARKING BLUE 300ML****DESCRIPTION**

A fast drying contrast resin in an aerosol can for accurate scribing on metal surfaces, plastics and glass.

- Typical Industries
- Tool and die makers
- Pattern makers
- Sheet metal workers
- Machinists
- Construction welders
- Designers

APPLICATION

- Apply to oil free surface by means of spraying.
- Wait a few minutes and commence scribing.
- It can be removed by most commercial solvents or Swift P3 Safety solvent.

**DESCRIPTION**

- Swift dry film lubricant is an excellent Molybdenum disulphide extreme pressure lubricant in a fast drying, quick curing heat resistant resin.
- It's a fast cure, molybdenum disulphide dry bonded lubricant for splined shafts.
- Does not wash off permanent lubricant of linkages and small sliding parts.
- It can be sprayed, dipped or applied by brush
- Preassembly treatment.
- High protective coating.
- High temperature lubricant .
- Dry lubricant.

APPLICATION

- For applications where wet lubricants cannot be tolerated.
- It does not rub off on wet conditions, prevents corrosion and does not collect dust.
- Long life service lubricant for textile and vending machines, computers, business machines, tumbler locks and instruments. In many cases it provides lifetime lubrication for the mechanisms.

**HERS0095****HERSCHELL FAST DRY FILM
SPRAY 300ML**

**HERS0215****HERSCHELL MOULD GUARD CLEAR 400ML****DESCRIPTION**

- A multi-purpose and highly effective clear fluid for protection of metal from atmospheric corrosion in under roof conditions.
- Quick penetration even in areas difficult to access. It offers reliable corrosion protection for machines and machine elements during intermediate storage and transportation.
- Due to its adhesive properties to all metallic surfaces, it provides excellent corrosion protection providing an ultra thin film that does not have to be removed from plastic moulds before being returned to service.

APPLICATION

- Protection of metal from atmospheric corrosion in under roof conditions.
- It offers reliable corrosion protection for machines and machine elements during intermediate storage and transportation
- Has incredible creeping properties to get into all nooks and hard to reach places
- Can be used in the plastic injection molding industries.

**HERS0220****HERSCHELL NICKLE ANTI-SEIZE PASTE 500ML****DESCRIPTION**

- A premium grade industrial anti-seize compound, made from high quality sub-micronic nickel powder, fortified with extreme pressure and anti-wear additives.
- Nickel plated mineral oil grease.
- Higher drop point than other grease.
- Prevent seizing, galling and corrosion up to 1400°C.
- Excellent metal adhesion.
- Resists washout of treads by fresh or salt water.

APPLICATION

- Suitable for use on all steels including stainless and austenitic.

**HERS0060** **HERSCHELL GEAR/WIRE/
ROPE SPRAY 400ML****DESCRIPTION**

- A black very adhesive semi synthetic open gear grease with extreme load capability providing a water-resistant film to withstand any arduous operating conditions.
- Lubricant for small open gears and wire ropes.
- Contains no bitumen.
- Solvent free water resistant.
- Provides low starting torque at low temperature.
- Penetrates deep into the core of the rope ensuring protection and continued lubrication of the wire strands against fretting corrosion.

APPLICATION

- For use in worm-drive gears and open gears under high load conditions.

**HERS0540** **HERSCHELL GREASE H/DUTY
INDUSTRIAL 500ML****DESCRIPTION**

- A heavy Duty Lithium Soap based grease, fortified with solid lubricants for heavy load & industrial requirements.
- Excellent service life even at extreme temperature ranges. Prevents bearings from "oil film failure" particularly in severe vibrating conditions.

APPLICATION

- Excellent for bearings in an industry subject to extreme loads at slow speeds.

**HERS0100****HERSCHELL ANTI SCUFF
SPRAY 400ML****DESCRIPTION**

- A synergistic combination of solid lubricants in aerosol form for assembly of all types of metal components. It is blue black in color with a very low coefficient of friction.
- First aid for scored surfaces.
- No burnishing required as the paste has EP additives for moderate loads and MoS₂ power for high load.

APPLICATION

- Used for the assembly of moving parts to prevents scuffing and scoring.
- For effective running in an assembly of sliding operation and preparation of plain bearings.

**HERS0367****HERSCHELL PROTECTIVE WAX
SPRAY 400ML****DESCRIPTION**

- Protects metal from corrosion indoor and outdoor.
- Penetrates deep into metal.
- Forms a flexible plastic protective layer.
- Salt water resistant.
- Adhesion grips the metal and displaces moisture.
- Stops rust from starting.

APPLICATION

- Automobiles, inside car doors, box panels.
- Boats and marine equipment.
- House hold appliances - fridges, washing, machines, dishwashers, garden and security.
- Metal fabrication.
- Classic car rebuilds.

**HERS0085****HERSCHELL GREASE LIQUID
SPRAY 400ML****DESCRIPTION**

- A tacky high viscosity index base oil in a lithium soap grease diluted with a volatile carrier to enable it to penetrate the lubrication slots of the links of drive chains.
- Does not fling off.
- Extends chain life.
- Resists water wash off.
- Suitable for high loads.

APPLICATION

- Chain lubricant.
- Penetrating oil and grease lubricant.

**HERS0070****HERSCHELL GREASE MULTI
PURPOSE EP2 15KG****DESCRIPTION**

- Multi-purpose lithium based mineral oil grease which is suitable for heavy duty applications.
- It is dark beige in color, contains high levels of EP additives, rust and oxidation inhibitors and tackifiers.
- The base oil is 100cst @ 40°C to provide excellent lubrication for medium and low speed anti-friction bearings.
- Low bleeding at high temperatures.
- Excellent oxidation stability.
- High corrosion protection.

APPLICATION

- Can be used on automotive and industrial applications.
- Outstanding as a general chassis lubricant.
- Primary designed for wheel bearing application.

**HERS0065**

HERSCHELL GREASE MULTIPURPOSE EP2 500G

DESCRIPTION

- Multi-purpose lithium based mineral oil grease which is suitable for heavy duty applications.
- It is dark beige in color, contains high levels of ep additives, rust and oxidation inhibitors and tackifiers.
- The base oil is 100cst @ 40°C to provide excellent lubrication for medium and low speed anti friction bearings.
- Low bleeding at high temperatures.
- Excellent oxidation stability.
- High corrosion protection.

APPLICATION

- Can be used on automotive and industrial applications.
- Outstanding as a general chassis lubricant.
- Primary designed for wheel bearing application.

**HERS0075**

HERSCHELL GREASE MULTI PURPOSE WR 500G

DESCRIPTION

- Slow-moving Heavy-duty wheel bearing grease with extreme high adhesion properties.
- Fortify with rust and oxidation inhibitors and has a great resistance to water.

APPLICATION

- Suitable for lubrication of plain, needle, ball and roller bearings of all types.
- Chassis lubrication, hinges, winding mechanisms, suspension, steering linkage systems, etc...
- Ball & roller bearings, conveyor bearings, plain bearings, slides - general industrial lubrication needs.
- General purpose lubrication of all automotive and agricultural equipment.

**DESCRIPTION**

- Heavy duty mineral oil grease containing white solid lubricants
- Excellent metal retention
- Bearings in household appliances
- Conforms to USDA H2 rating (Food grade)

APPLICATION

- Can be used where cleanliness is of utmost importance (White in colour)
- Can be used to lubricate 3D printer mechanism parts, gears, hinges etc.

**HERS0080****HERSCHELL WHITE GREASE
LITHIUM W2 5KG**

**HERS4080****HERSCHELL MOLY
POWDER SPRAY 400ML****DESCRIPTION**

- This aerosol contains the solid lubricant molybdenum disulphide dispersed in a fast evaporating solvent to enable the user to spray a completely dry lubricating film onto any bearing surface.
- This blue grey layer is an extremely good lubricant that will not attract dust to form grinding paste and its ability to lubricate dry without a liquid film ensures lubrication areas where it is impossible to avoid contamination from dust, paper dust, cotton flock, milled grains etc.

APPLICATION

- Bearing assembly.
- Dry lubricant for chains.
- First aid lubricant for scored surfaces.
- Textile machinery.
- Slides.
- Linkages, cables, Cams.
- Press fitting.
- Lubricated for life components.
- Run in lubricant.
- Stainless fastener anti seize.
- Deep drawing of various metals.
- Punching.
- Extrusion lubricant.
- Machining.
- Wire drawing.
- Spring lubricant.

**HERS0120****HERSCHELL CHAIN & LINK
SPRAY 400ML****DESCRIPTION**

- A tacky high viscosity index base oil thickened with an organic thickener, with surface tension modifiers to enable it to penetrate the links of drive chains.
- Rapidly penetrates chain linkages.
- Contains anti-wear additives.
- Non-Fling off formula.
- Highly water resistant.
- Formulated for extreme loads and temperatures.
- Extends chain life.

APPLICATION

- It's a chain lubricant which penetrates chain linkages while forming a tough water-resistant film.
- Industrial drive chains - All sizes.
- Agricultural farm implements.
- Cycle chains.
- Motorbike high speed power transmission chains.

**HERS0366****HERSCHELL ANTI SPATTER
SILICONE 400ML****DESCRIPTION**

- Description : A clear heat resistant silicone anti spatter fluid spatter in an aerosol can. Its function is to prevent the adherence of the weld spatter to the nozzles and shrouds of gas shrouded equipment.
- Ensures easy release of unwanted weld spatter.

APPLICATION

- Nozzles and shrouds of gas shrouded welding equipment to prevent adhesion of weld spatter and damage from cleaning.
- Protects jigs from becoming unserviceable due to build up of spatter.
- Protects workpieces such as threads and machined parts from spatter adhesion when welding in restricted spaces.

**HERS0240****HERSCHELL ANTI-SPATTER
NON SILICONE SPRAY 400ML****DESCRIPTION**

- A straw yellow heat resistant anti spatter fluid packed in an aerosol can. Its function is to prevent the adherence of weld spatter to the nozzles and shrouds of gas shrouded welding equipment.
- Prevents fisheyes.
- Does not interfere with adhesion qualities of paint.
- Allows subsequent coating without removal.

APPLICATION

- For welding operations
- Ideal for manufacturing, construction, shipbuilding and metalworking.

**HERS1593**
**HERSCHELL MOULD & DIE
RELEASE SPRAY 400ML**
DESCRIPTION

- A clear straw coloured fluid for release of mouldings in the plastic, rubber and die casting industry. This product permits adhesion of paints, coatings, transfers and plating without any special degreasing operations.
- It is suitable for virtually all types of plastic and rubber and its heat resistant qualities enable it to release and function as a (parting compound) for die casting.

APPLICATION

- Mould release for the widest range of plastic compositions.
- Mould release for rubber mouldings, hose mandrels, continuous moulding drums.
- Die casting parting agent for zinc, aluminium and magnesium.
- In bulk form it will function as an assembly fluid and provides continuous lubrication if incorporated into the plastic as an additive plasterciser.

**HERS6340**
**HERSCHELL P3 SAFETY
SOLVENT 400ML**
DESCRIPTION

- A non flammable colourless liquid which dries at medium speed without residue.
- The boiling range is above 120°C.
- Soil removal & application
- This solvent must be used cold
- Solvent can be applied by brush, dipped or spray method.
- It's a good solvent for greases, gums, oils & waxes.

APPLICATION

- Rolls, Bearings Fabrics & some electrical equipment.

**HERS0245****HERSCHELL MACHINE
CUTTING FLUID 400ML****DESCRIPTION**

- MF Machining fluid spray is a heavy duty, general purpose, neat, dark, active cutting oil.
- Tapping, Reaming & Drilling fluid.
- For Ferrous metals.
- Keeps drill at a constant temperature.

APPLICATION

- Drilling & Boring
- Turning & Reaming
- Milling & Tapping
- Threading & Parting
- Broaching & Hacksawing

**HERS9295****HERSCHELL MACHINE
CUTTING F (SS) 400ML****DESCRIPTION**

- An aerosol containing highly chlorinated cutting oil suitable for machining stainless steel components. This enables machine tool operators to economically complete once-off operations without having to fill a whole machine sump with soluble or neat cutting oil for a special operation.
- Stainless steel tapping & reaming spray assists the cutting operation by forming a chemical reaction at the tool tip producing a separating compound with high shear strength, thereby decreasing the friction at the cutting edge.
- It disperses the heat, chills the tool tip, preventing softening of the tool and reduction of its cutting power by loss of temper. Correct lubrication of the tool and workpiece gives finer surface finish and prolonged tool life.

APPLICATION

- Drilling & Boring
- Turning & Reaming
- Milling & Tapping
- Threading & Parting
- Broaching & Hacksawing

**HERS2960****HERSCHELL INDUSTRIAL
DEGREASER H/D 5L****HERS2961****HERSCHELL INDUSTRIAL
DEGREASER H/D 25L****DESCRIPTION**

- A translucent red alkaline water based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- Concentrate - can be diluted up to 1-15 with water.
- Environmentally friendly to fish and plants.
- Power detergent - cleans away oil deposits
- Suspending agents to flush away solids i.e.. Silica, graphite etc.
- Plastic friendly
- Low foam
- Strongest detergent effect at 1-4 with water

APPLICATION

For cleaning engines of : -

- Automobiles
- Trucks
- Busses
- Factory floors
- Industrial machinery
- Mining
- Marine equipment

**HERS2670****HERSCHELL HIGH ALKALINE
DEGREASER 5L****HERS2671****HERSCHELL HIGH ALKALINE
DEGREASER 5L****DESCRIPTION**

- A translucent amber alkaline water based fluid with ingredients conforming to the latest European regulations which relate to control of pollution and use of chemicals and their disposal.
- Concentrate - can be diluted up to 1-15 with water.
- Environmentally friendly to fish and plants.
- Power detergent - cleans away oil deposits
- Suspending agents to flush away solids i.e.. Silica, graphite etc.
- Plastic friendly
- Low foam
- Strongest detergent effect at 1-4 with water

APPLICATION

For cleaning engines of :-

- Automobiles
- Trucks
- Busses
- Factory floors
- Industrial machinery
- Mining
- Marine equipment

BICYCLE

**HERS0400**
**HERSCHELL BIKE ACTIV
BAG SPRAY 300ML**
DESCRIPTION

- Aerosol disinfectant spray for disinfecting of all riding gear.
- Kills 99% of known bacteria.
- Helps prevent odour in helmets and cleats caused by perspiration.
- Improved "green" environmental credentials
- Proven efficacy.
- Safe on most surfaces and materials.

APPLICATION

- Designed to be used on items that can't be put into a washing machine. Like helmets, cleats, tog bags, etc. Safe on most surfaces.

**HERS0415**
**HERSCHELL BIKE CHAIN
CLEANER SPRAY 300ML**
DESCRIPTION

- Powerful solvent based cleaner and degreaser for cleaning of all bicycle chains.
- Removal of old lubricant allows for effective chain penetration of fresh lubricant.
- Leaves very light oily residue.
- Safe on most surface and materials.
- Softens and blasts away chain dirt and grime.

APPLICATION

- For stubborn chain residues allow a few minutes for solvent to work before repeating and re-cleaning.

**HERS0440****HERSCHELL BIKE
CLEANER 1L****HERS0445****HERSCHELL BIKE
CLEANER 5L****DESCRIPTION**

- General Broad use bicycle cleaner. Can be used on all type of bikes.
- Plastic & rubber friendly.
- Can be diluted up to 1 – 9.
- Improved “green” environmental credentials
- Biodegradable formulation and solvent free.
- Suspending agents flush away dirt and grease.
- Powerful detergent and degreaser.

APPLICATION

- Dirt and degreaser for all types of bikes. Plastic, rubber, metal and carbon friendly.

**DESCRIPTION**

- For chains with more off-road bias. Water-based wax emulsion that is ideal for chains, shifters, pedals and cleats.
- **Laboratory proven** lubricity and wear claims.
- **Improved** “green” environmental credentials.
- **Fortified** with ceramic and solid lubricant technology and EP additives for significantly reduced drive train wear.
- **Non-fling** and highly water resistant. Thin lubricant layer reduces the attraction of unwanted dust

APPLICATION

- For chains with more off-road bias.

**HERS0435****HERSCHELL BIKE DRY CHAIN
LUBE 125ML**

**HERS0430****HERSCHELL BIKE WET CHAIN
LUBE 125ML****HERS0405****HERSCHELL BIKE WET CHAIN
LUBE SPRAY 300ML****DESCRIPTION**

- For chains with more on-road bias. Ideal for chains, shifters, pedals and cleats.
- **Laboratory proven** lubricity and wear claims.
- **Improved** "green" environmental credentials.
- **Fortified** with ceramic and solid lubricant technology and EP additives for significantly reduced drive train wear.
- **Non-fling** and highly water resistant. Thin lubricant layer reduces the attraction of unwanted dust.

APPLICATION

- For chains with more on-road bias.

**HERS0425****HERSCHELL BIKE TYRE SEAL
(TUBED) 400ML****DESCRIPTION**

- Liquid based tyre-sealant for on and off-road tyres.
- Co2 compatible.
- Improved “green” environmental credentials
- Will not damage any tyres, carbon fibre or metal.
- Specialised synthetic latex.
- Seals tyre and rim.

APPLICATION

- Seals holes up to 5mm in diameter.

**HERS0420****HERSCHELL BIKE TYRE
SEAL (TUBLESS) 400ML****DESCRIPTION**

- Liquid based tyre-sealant for on and off-road tyres.
- Co2 compatible.
- Improved “green” environmental credentials
- Will not damage any tyres, carbon fibre or metal.
- Specialised synthetic latex.
- Seals tyre and rim.

APPLICATION

- Seals holes up to 5mm in diameter.

**HERS0410****HERSCHELL BIKE X-PROTECT SPRAY 300ML****DESCRIPTION**

- Enhances shine and protects composite and metal frames for ON and OFF-Road bikes.
- Inherently anti-static.
- Cleans, enriches and helps hiding small scratches.
- Protects against UV damage.
- Leaves thin protection layer between dirt and bicycle.

APPLICATION

- Apply to clean bicycle.

**DESCRIPTION****KIT CONTAINS:**

- Bike chain cleaner spray 300ml (HERS0415)
- Bike tyre seal - tubeless 400ml (HERS0420)
- Bike cleaner 1Litre (HERS0440)
- Bike wet chain lube 125ml (HERS0430)
- Bike dry chain lube 125ml (HERS0435)

HERS0460**HERSCHELL BIKE KIT (5PC)**

**HERS0455****HERSCHELL BIKE KIT WET
(3PC)****DESCRIPTION**

KIT CONTAINS:

- Bike chain cleaner spray 300ml (HERS0415)
- Bike cleaner 1Litre (HERS0440)
- Bike wet chain lube 125ml (HERS0430)

**HERS0450****HERSCHELL KIT DRY (3PC)****DESCRIPTION**

KIT CONTAINS:

- Bike chain cleaner spray 300ml (HERS0415)
- Bike cleaner 1Litre (HERS0440)
- Bike dry chain lube 125ml (HERS0435)
